

## September 2015 Data Release

The Home Purchase Sentiment Index<sup>™</sup> (HPSI) is a composite index designed to track consumers' housing-related attitudes, intentions, and perceptions, using six questions from the National Housing Survey<sup>™</sup> (NHS).

#### The Home Purchase Sentiment Index

After declining over the past 3 months, the HPSI rose to 83.8 in September. The HPSI is 3 points higher than last month.

# **Components of the HPSI**

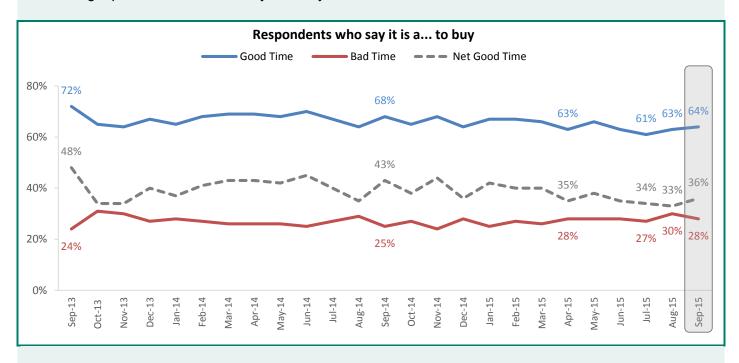

Four components of the HPSI improved in September, with the largest increase in Good Time To Sell (+13). Both Home Price and Mortgage Rate net expectation fell (-2 and -1 respectively) since last month.

	September 2015*	Change Since Last Month	Change Since Last Year
September 2015 HPSI	83.8	+3	+3.6
Good Time To <b>Buy</b>	36	+3	-7
Good Time To Sell	16	+13	+28
Home Prices Will Go Up (next 12 months)	36	-2	-1
Mortgage Rates Will Go Down (next 12 months)	-50	-1	-10
Confidence About Not Losing <b>Job</b> (next 12 months)	69	+2	+8
Household Income is Significantly Higher (past 12 months)	15	+3	+4

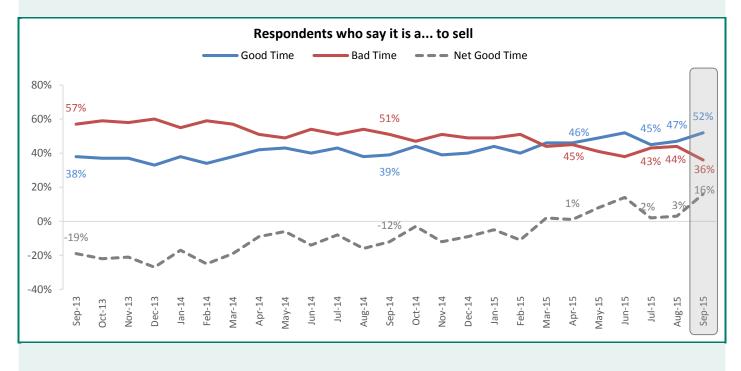

Net percentages of the component questions used to calculate HPSI, e.g. (Percent Good Time to Buy – Percent Bad Time to Buy) = 36

## Components of the HPSI - Good/Bad Time to Buy and Sell a Home

The share of respondents who said that it's a good time to buy a house rose 1 percentage point to 64%, continuing a positive trend since July's survey low.

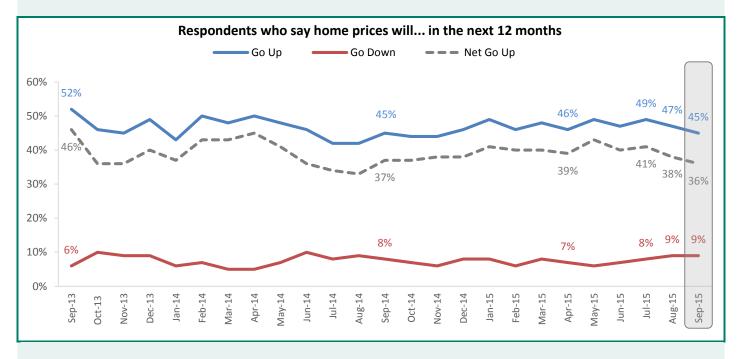

Those who say it's a good time to sell rose 5 percentage points to 52%, tying June's survey high. The percent of respondents who say it's a bad time to sell decreased to 36%, setting a new survey low.

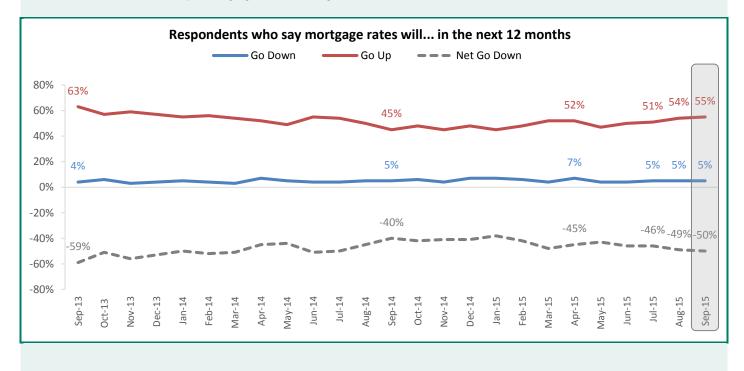

## **Components of the HPSI – Home Price and Mortgage Rate Expectations**

The percent of respondents who said that home prices will go up over the next 12 months fell to 45%. The percent who said that home prices will go down remained constant at 9%.

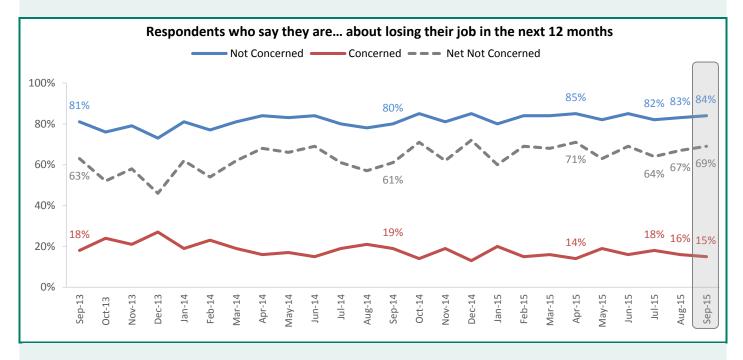

The share who expect mortgage interest rates to go up in the next 12 months rose 1 percentage point to 55%. The share who say mortgage rates will go down remained at 5%.

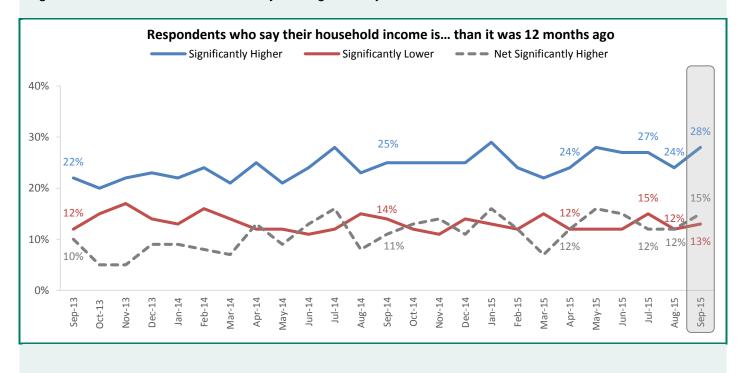

## Components of the HPSI - Job Concerns and Household Incomes

The share of respondents who say they are not concerned with losing their job rose to 84%, while the share of respondents who say they are concerned with losing their job fell to 15%.

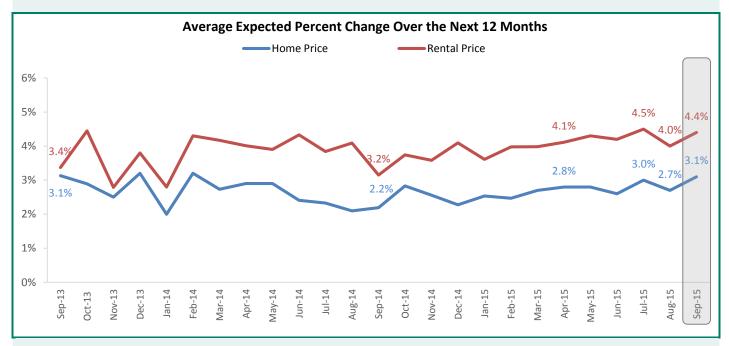

The share of respondents who say their household income is significantly higher than it was 12 months ago rose to 28%, while those who say it is significantly lower rose as well to 13%.

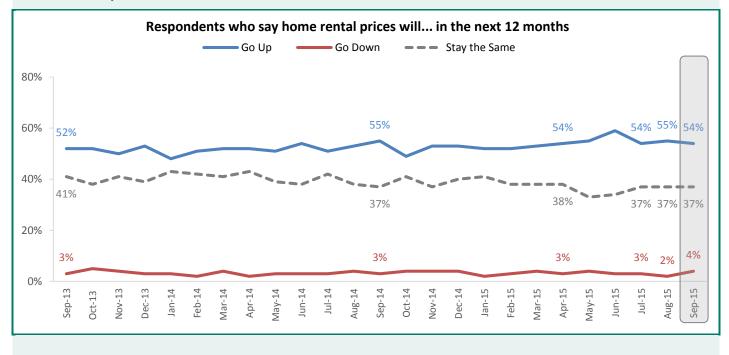

## **Additional National Housing Survey Key Indicators**

On average, respondents expected rental prices over the next 12 months to rise 4.4%. They expected home prices over the next 12 months to rise 3.1%.

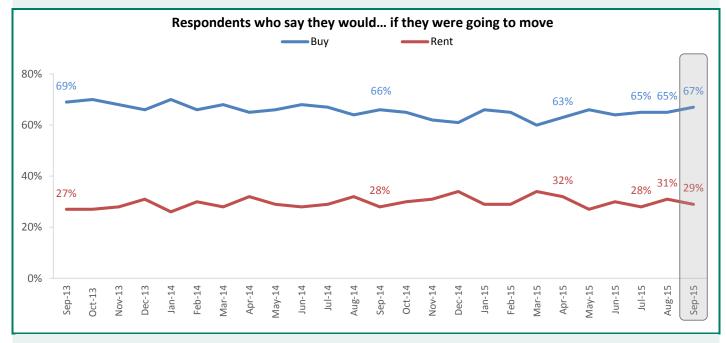

The percentage of respondents who expect home rental prices to go up fell back to 54%. The percentage of respondents who expect home rental prices to go down rose to 4%, bouncing back from last month's all-time survey low.

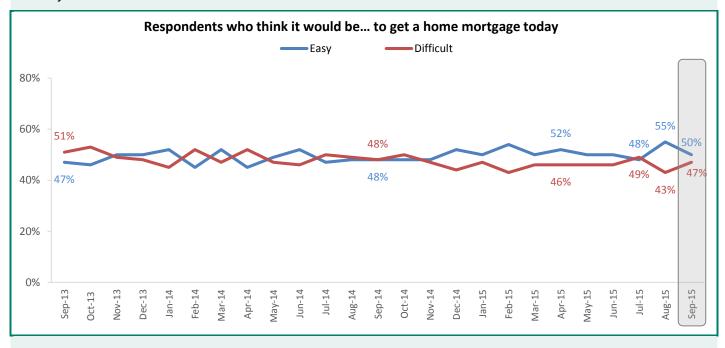

## **Additional National Housing Survey Key Indicators**

The share who say they would buy if they were going to move rose 2 percentage points to 67%, while the share who would rent fell to 29%.

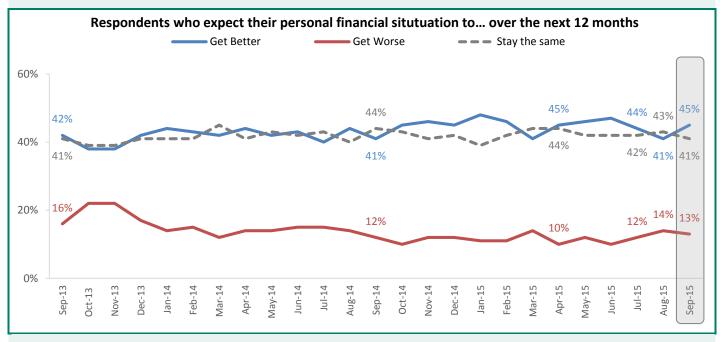

50% of respondents say it would be easy to obtain a mortgage, falling from August's all-time survey high. At the same time, 47% of respondents say it would be difficult to obtain, rising from August's all-time survey low.

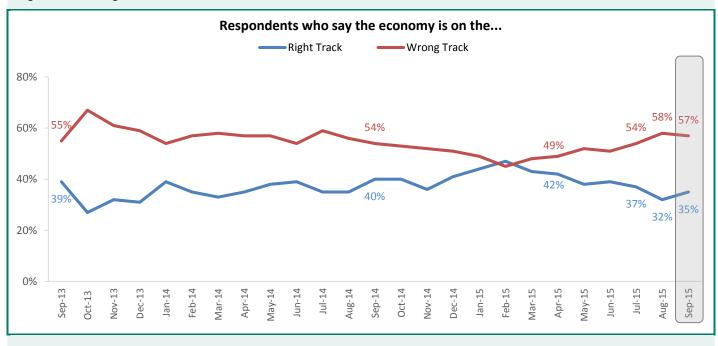

## **Additional National Housing Survey Key Indicators**

The percentage who expect their personal financial situation to get worse over the next 12 months fell to 13%, while the percentage who expect their personal financial situation to get better rose to 45%.

The share of respondents who say the economy is on the right track rose by 3 percentage points to 35%, while those who say it is on the wrong track fell by 1 percentage point to 57%, shrinking the gap between right and wrong track.

## The National Housing Survey™

#### September 2015

#### **APPENDIX**

#### **About the Survey**

The National Housing Survey<sup>™</sup> polled a nationally representative sample of 1,003 household financial decision makers (margin of error ±3.1%) aged 18 and older between September 1, 2015 and September 25, 2015. Most of the data collection occurred during the first two weeks of this period.

Interviews were conducted by Penn Schoen Berland, in coordination with Fannie Mae.

The statistics in this release were estimated from sample surveys and are subject to sampling variability as well as nonsampling error, including bias and variance from response, nonreporting, and undercoverage. Averages of expected price changes were calculated after converting responses of "stay the same" to 0% and after excluding outliers, which were defined to be responses that were more than two standard deviations from the means.

How the Home Purchase Sentiment Index (HPSI) is Calculated*			
Net Good Time to <b>Buy</b> Very and Somewhat Good Time To Buy – Very and Somewhat Bad Time To Buy	Q12		
Net Good Time to <b>Sell</b> Very and Somewhat Good Time To Sell – Very and Somewhat Bad Time To Sell	Q13		
Net <b>Home Prices</b> Will Go Up (next 12 months)  Home Prices Will Go Up – Home Prices Will Go Down	Q15		
Net <b>Mortgage Rates</b> Will Go Down (next 12 months)  Mortgage Rates Will Go Down – Mortgage Rates Will Go Up	Q20B		
Net Confident About Not Losing <b>Job</b> (next 12 months)  Not at All and Not Very Concerned about Losing Job – Very and Somewhat Concerned about Losing Job	Q112B		
Net Household <b>Income</b> is Significantly Higher (past 12 months)  Income is Significantly Higher – Income is Significantly Lower	Q116		
$HPSI = \frac{Q12 + Q13 + Q15 + Q20B + Q112B + Q116}{6} + 63.5$			
* The HPSI calculation includes the addition of a constant of 63.5 in order to set the index's initial value at 60 as of March 2011, in range with the Index of Consumer Sentiment and the Consumer Confidence Index
