Project Context and Objective

This 2018 study from Fannie Mae's Economic and Strategic Research team was designed to track changes in misperceptions of mortgage requirements. The original benchmark study was undertaken in the summer of 2015 and found that consumers broadly lack an understanding of the basic thresholds to qualify for a mortgage, including down payment, debt-to-income ratio, and credit score requirements.

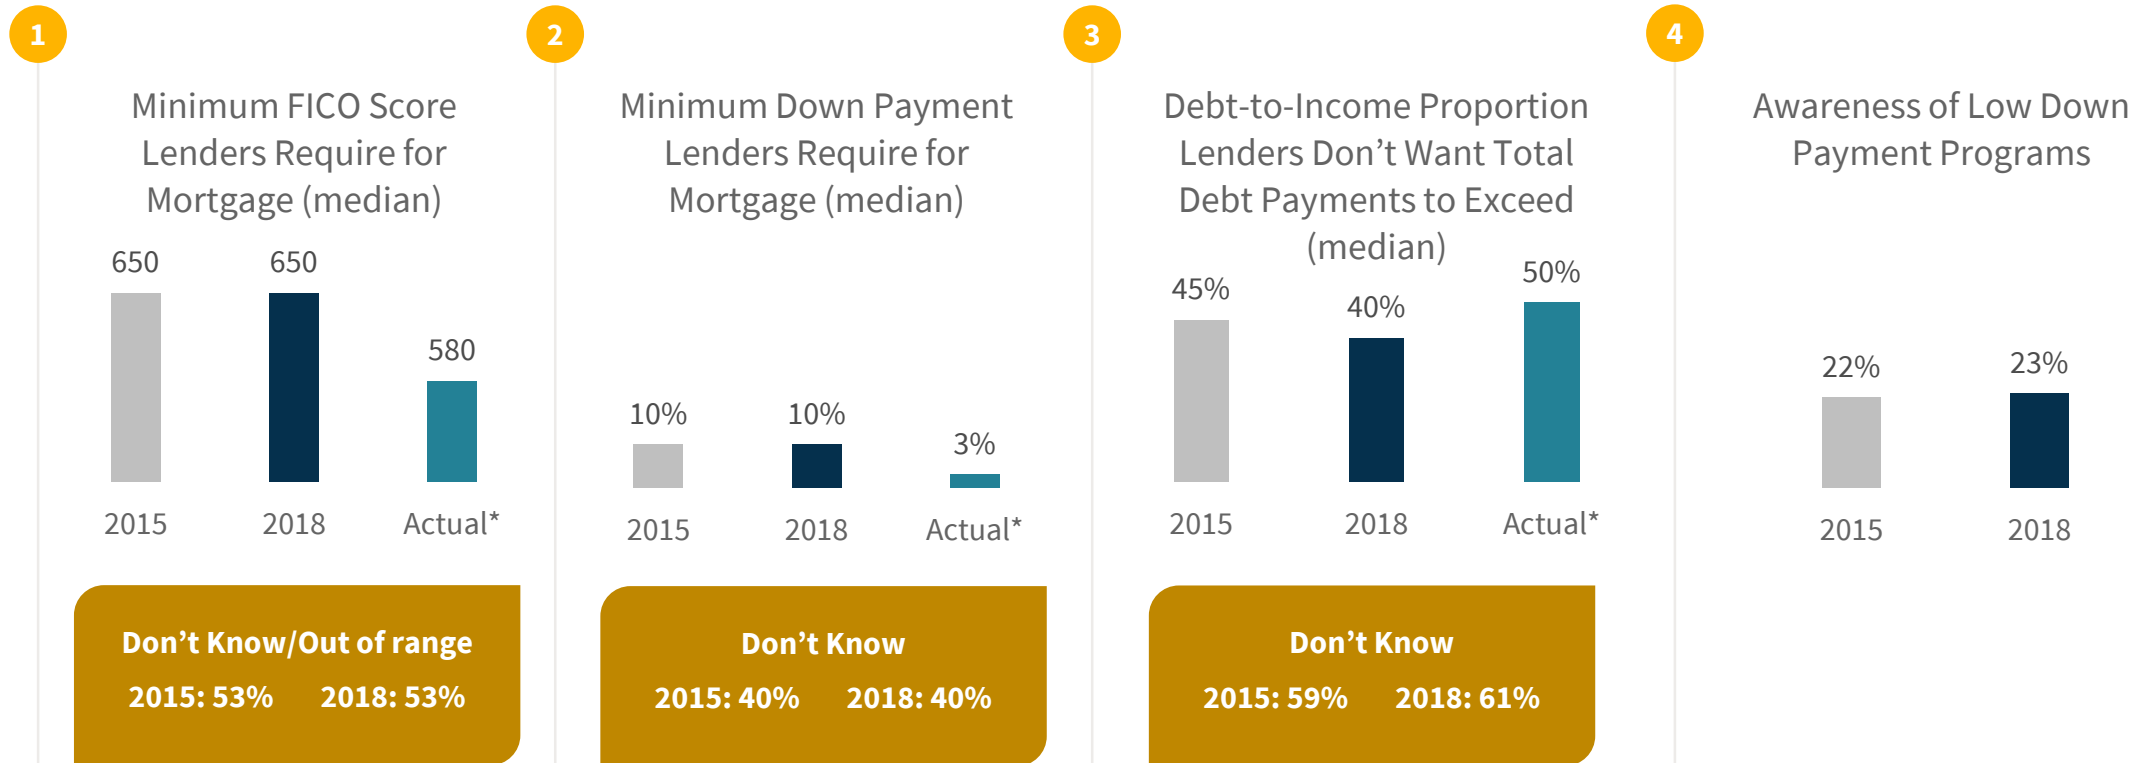

This online survey was conducted using a nationally representative sample of over 3,000 respondents. Detailed information on the survey design, methodology, and sample construction can be found in the appendix.

Key Findings

Despite increased exposure to credit scores and online information, consumer understanding about what it takes to qualify for a mortgage has not improved since 2015, even though consumer confidence about the mortgage process has grown modestly.

- 1 More consumers report seeing their credit score recently, but close to half still cannot recall what it is.
- 2 Although the usage of online sources of mortgage information is becoming more common among consumers, they still:
 - Overestimate the minimum credit score necessary to qualify for a mortgage;
 - Overestimate the minimum down payment necessary to qualify for a mortgage; and
 - Remain unfamiliar with low down payment programs.
- 3 Even populations that might seem to be more knowledgeable, such as current homeowners, those who say they are actively planning to become homeowners in the next three years, and those who demonstrate general financial literacy, are not much more knowledgeable than the rest of the population about mortgage requirements.

Consumers Continue To Overestimate Mortgage Qualification Requirements

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018

Q29. In order for borrowers to get a mortgage today, what do you think is the minimum FICO® score lenders would require?

Q33. What do you think is the minimum down payment that lenders actually require?

Q35. And what is the percentage of a borrower's household monthly income that lenders do not want borrower's recurring monthly debt payments to exceed?

Q38. As you may know, there are programs that allow some people to get a mortgage with a down payment as low as 3% to 5% of the sale price or the appraised value of the home. Generally speaking, how familiar are you with these programs?

Implications

1

Current sources of mortgage education and information are insufficient

Even those actively planning to become homeowners in the next few years (i.e., those who should be exposed to more information– are only slightly more confident and knowledgeable than others.

2

While viewing one's credit score is a good start, Americans need to understand what to do with that information

Although Americans are confident they could improve their credit score, monitoring a credit score is not the same as understanding how the score impacts their financial situation.

3

Misperceptions about mortgage qualifications may be holding people back

For some who would like to own a home, they might qualify for a mortgage but may assume that homeownership is not a possibility. As a result, they may avoid further research or preparations, such as saving for a down payment or improving their credit.

Closing the Knowledge Gap

1 More effective mortgage education should be timely, customized, convenient, and simple

Customized information, delivered right when someone is making a decision, including whether to buy, how much to save, what they can afford, or what type of mortgage to get, leads to better consumer outcomes.¹

2 Optimizing mortgage information for mobile devices may be part of the solution

Americans – especially younger ones – are increasingly using mobile phones for financial services. Some mobile apps already help consumers budget, invest, and manage debt. Mortgage tools could be integrated into more of these apps to provide step-by-step advice.

3 Education should leverage multiple channels to reach consumers

Past research tells us that people prefer a mix of digital and human contact.² Even with significant development, mobile and online resources alone may not be sufficient to guide consumers through the complexities of preparing for and getting the right mortgage.

More Americans Report Seeing Their Credit Score

Significant increase led by:

- Age 18-34 (up 7 points)
- Age 65+ (up 7 points)

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018
Q24. Have you ever seen your credit score? [% saying 'yes']

Note: * = significant change

More Have Viewed Their Credit Score in Past Six Months

**Significant increase
led by:**

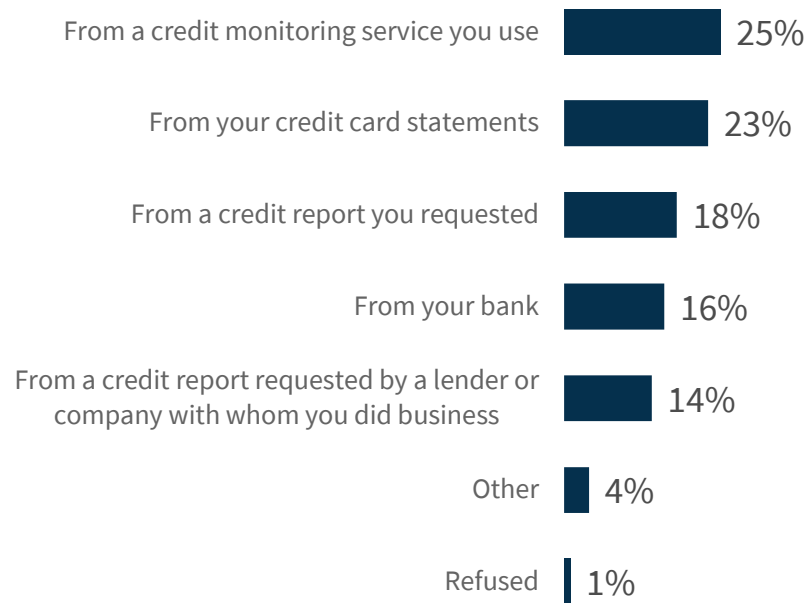

- College grads (up 16 points)

Base: Those who have seen their credit score before, N=2,893 in 2015, N= 3,215 in 2018
Q25. Approximately how long ago did you last see your credit score? [% saying 'within the last 6 months' of 5 options]

Note: * = significant change

Credit Monitoring Service and Credit Cards Are Leading Sources for Credit Score Viewing

Age differences:

- Age 18-34 favor Credit Monitoring to Credit Cards by 32% to 19%
- Age 65+ favor Credit Cards to Credit Monitoring by 30% to 19%

Base: Those who have seen credit score before, N=3215
Q26. How did you learn about your credit score the last time that you saw it? [selected one response]

Increasing Familiarity with the Term “FICO® Score”

Significant increase led by:

- Hispanics (up 12 points)
- Live in Northeast (up 10 points)

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018

Q28. How familiar are you with the term "FICO® score"? [% saying 'very familiar' or 'somewhat familiar' on 4-point scale]

Note: * = significant change

Despite Increased Familiarity, Four-in-Ten Still Don't Know Their FICO® Score

<u>Ease of Getting a Mortgage</u>	19
<u>Top Concerns Regarding Ability to Get a Mortgage</u>	21
<u>Down Payment Attitudes and Understanding</u>	22
<u>Relationship between Mortgage Misperceptions and Concerns</u>	27

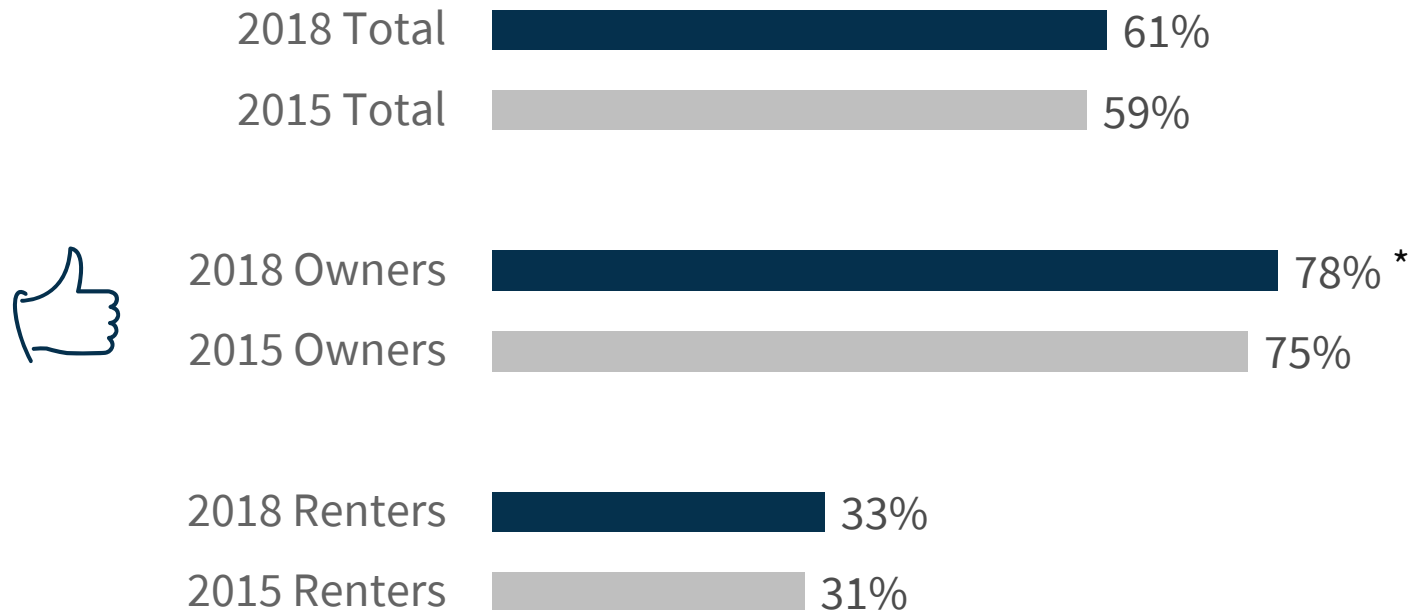

Americans Remain Confident About Improving Credit Score If Needed

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018
Q27. If you wanted to improve your credit score, how confident are you that you would be able to do so? [% saying 'very confident' or 'somewhat confident' on 4-point scale]

6-in-10 Say Getting A Mortgage Would Be Easy

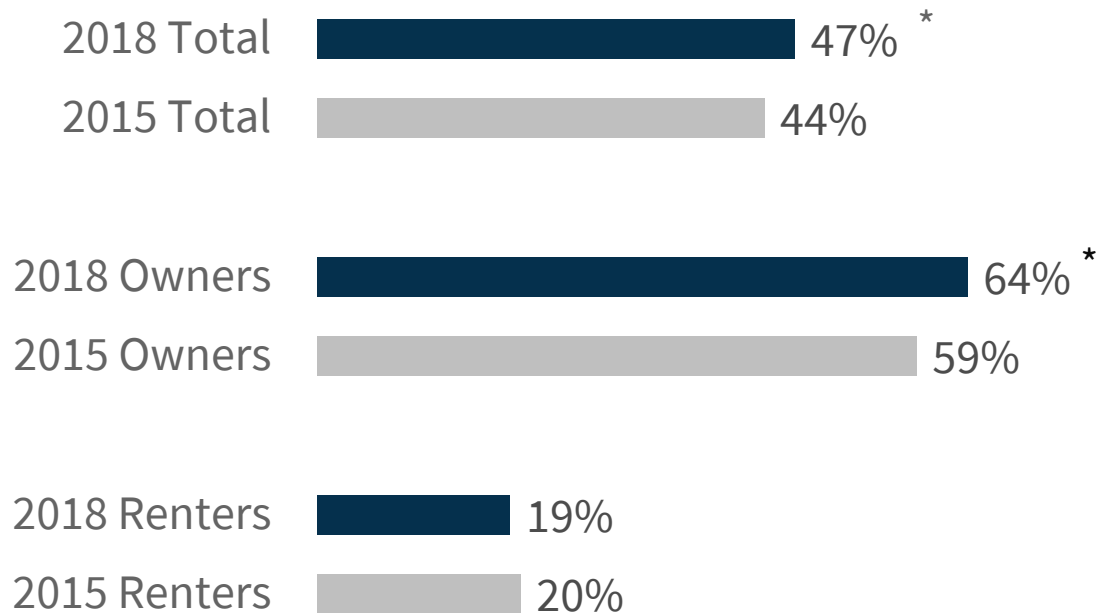

Owners remain much more confident about getting a mortgage than renters

Note: * = significant change

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018, Owners, N=2,430 in 2018, N=2,302 in 2015; Renters, N=973 in 2018, N=894 in 2015
Q17. How easy or difficult do you think it would be for you to get a mortgage to purchase or refinance a home today? [% saying 'very easy' or 'somewhat easy' on 4-point scale]
Note: *Total* figure includes *Owners*, *Renters*, and a third distinct subgroup not broken out separately on this slide: *those who do not pay for housing*. See appendix Q6 for further detail.

Confidence about Going Through Mortgage Process Increases Modestly

Owners, already much more confident than renters, account for all of the increase

Note: * = significant change

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018; Owners, N=2,430 in 2018, N=2,302 in 2015, Renters; N=973 in 2018, N=894 in 2015
Q19. In general, how confident would you feel if you were going through the process of getting a mortgage today to purchase or refinance a home? [% saying 'extremely confident' or 'very confident' on 5-point scale]

Note: Total figure includes Owners, Renters, and a third distinct subgroup not broken out separately on this slide: those who do not pay for housing. See appendix Q6 for further detail.

Income, Debt Top Reasons for Expected Difficulty with Mortgage

Most Important Reason for Difficulty in Getting a Mortgage	2015	2018
Insufficient income to afford monthly mortgage payments	21%	23%
Too much existing debt	18%	17%
Insufficient credit score or credit history	19%	15% *
Affording the down payment or closing costs	16%	14%
Lack of job security or stability	11%	9%
Mortgage application process is too complicated	4%	4%
Income fluctuates too much	0%	4% *
Documentation of income or down payment sources	4%	3% *
Lack of trusted sources of information to help you make the right decisions	2%	3%
Other (specify)	3%	7% *
Refused	0%	1% *

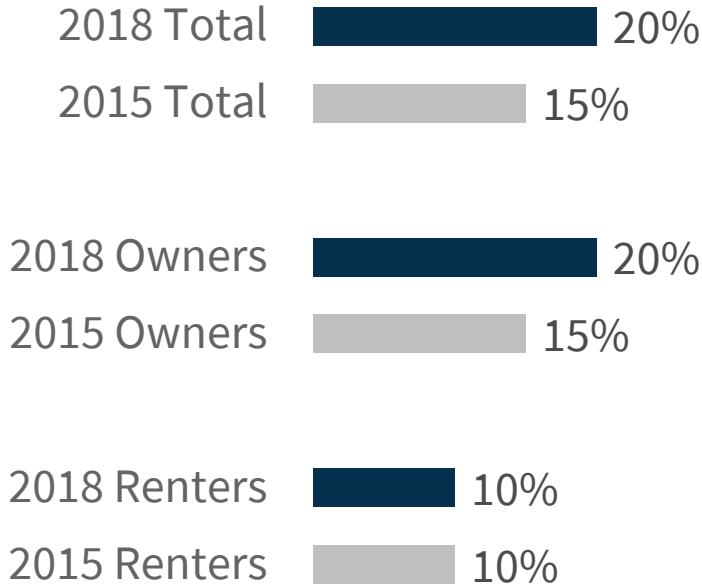

Just 4% report that the mortgage application process is too complicated

Base: Very/Somewhat difficult to get a mortgage today, N=1,371 in 2015, N=1,305 in 2018
 Q21_1st Earlier you mentioned that you think it would be very difficult, somewhat difficult for you to get a mortgage today to purchase or refinance a home. Listed below are some common reasons. Which of the following is the MOST important reason? [selected one response]

Note: * = significant change

The Average Consumer Now Prefers To Make a Larger Down Payment (median)

Owners seem to have grown more conservative about taking on mortgage debt

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018; Owners, N=2,430 in 2018, N=2,302 in 2015; Renters, N=973 in 2018, N=894 in 2015
Q31. What is the minimum percentage of the home's sale price or appraised value that you would feel comfortable paying as a down payment in order to proceed? [numeric, 0-100 range]
Note: *Total figure includes Owners, Renters, and a third distinct subgroup not broken out separately on this slide: those who do not pay for housing. See appendix Q6 for further detail.*

Average Perception of Down Payment Lenders “Expect” Is Increasing (median)

2018 Total 20%
2015 Total 15%

2018 Owners 20%
2015 Owners 20%

2018 Renters 20%
2015 Renters 20%

Note: Total figure includes Owners, Renters, and a third distinct subgroup not broken out separately on this slide: those who do not pay for housing. See appendix Q6 for further detail.

The average consumer perceives lenders to be more risk averse

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018; Owners, N=2,430 in 2018, N=2,302 in 2015; Renters, N=973 in 2018, N=894 in 2015
Q32. What is the percentage of a home's sale price or appraised value that lenders expect borrowers pay as a down payment for a typical mortgage today? [numeric, 0-100 range]

Americans Continue to Overestimate Down Payment Required for a Mortgage

% Down (Median)

Just 1-in-4 Americans Are Familiar with Low Down Payment Programs

Among Hispanics...

32% of English-speaking Hispanics are aware of low down payment programs, but only 12% of Spanish-speaking Hispanics are aware of such programs.

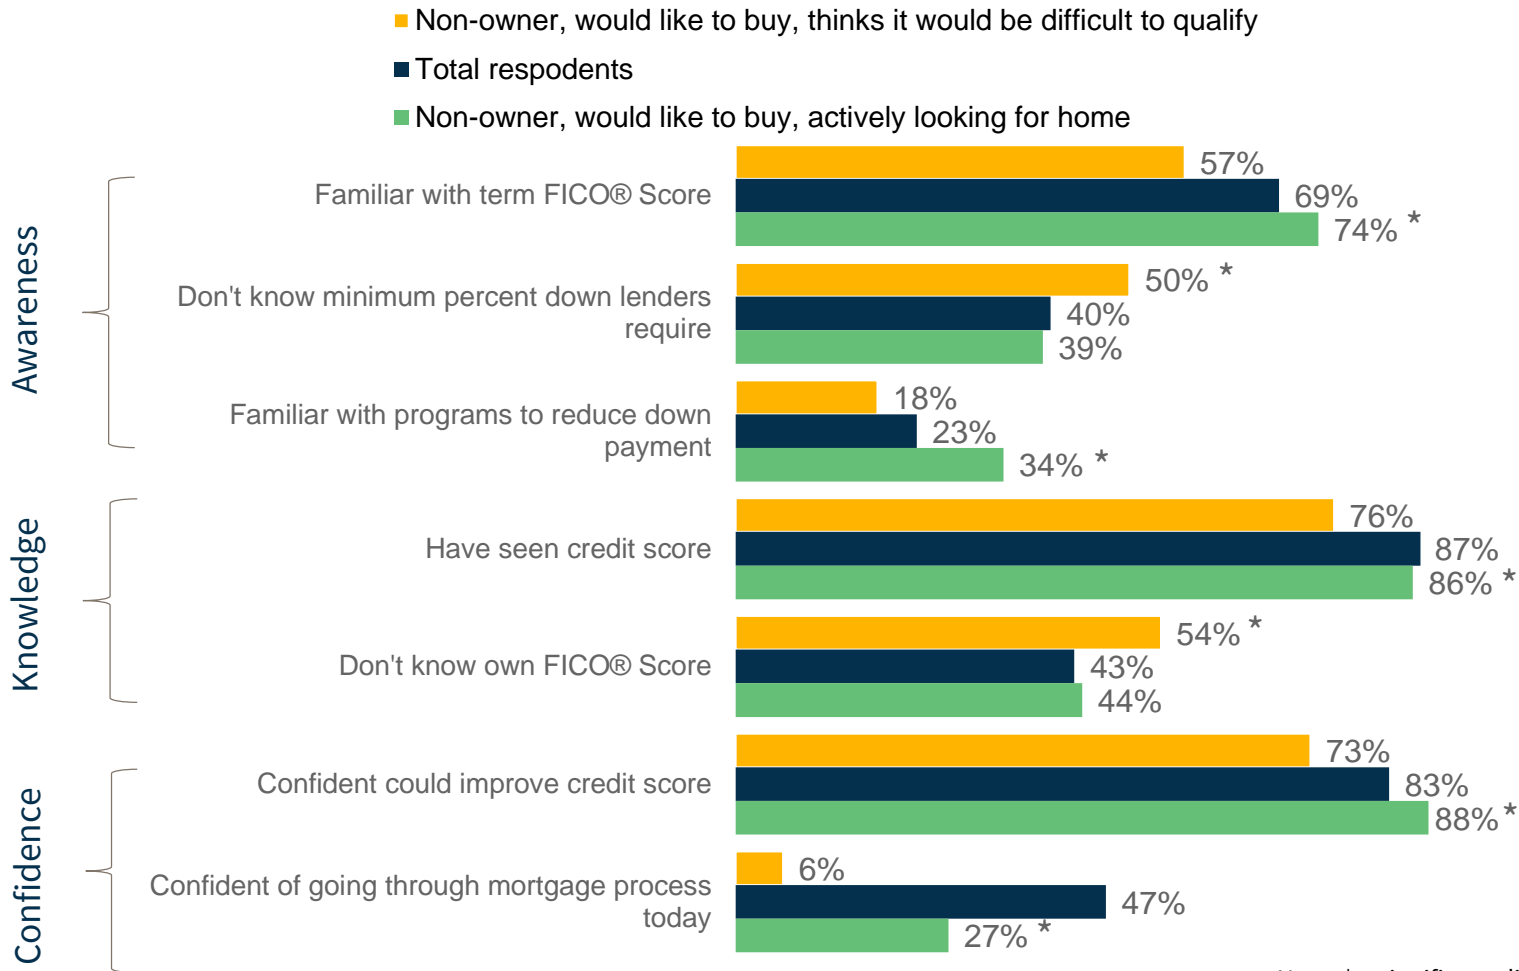

Note: # = Financially Literate (correctly answer each of 3 financial literacy questions; details on slide 49)

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018; Owners, N=2,430 in 2018, N=2,302 in 2015; Renters, N=973 in 2018, N=894 in 2015; Fin. Lit. 2018 N=2103
 Q38. As you may know, there are programs that allow some people to get a mortgage with a down payment as low as 3% to 5% of the sale price or the appraised value of the home. Generally speaking, how familiar are you with these programs? [% saying 'very familiar' or 'somewhat familiar' on 4-point scale]

Note: Total figure includes Owners, Renters, and a third distinct subgroup not broken out separately on this slide: those who do not pay for housing. See appendix Q6 for further detail.

Misperceptions May Drive Concerns

Note: The “difficult to qualify” and “actively looking for a home” groups are not mutually exclusive.

Among those who prefer owning to renting but think it would be difficult to qualify for a mortgage tend to have more uncertainty about mortgage qualifications, which may be holding them back from seeking more information or working toward a goal that seems out of reach.

Note: * = significant difference between non-owner groups

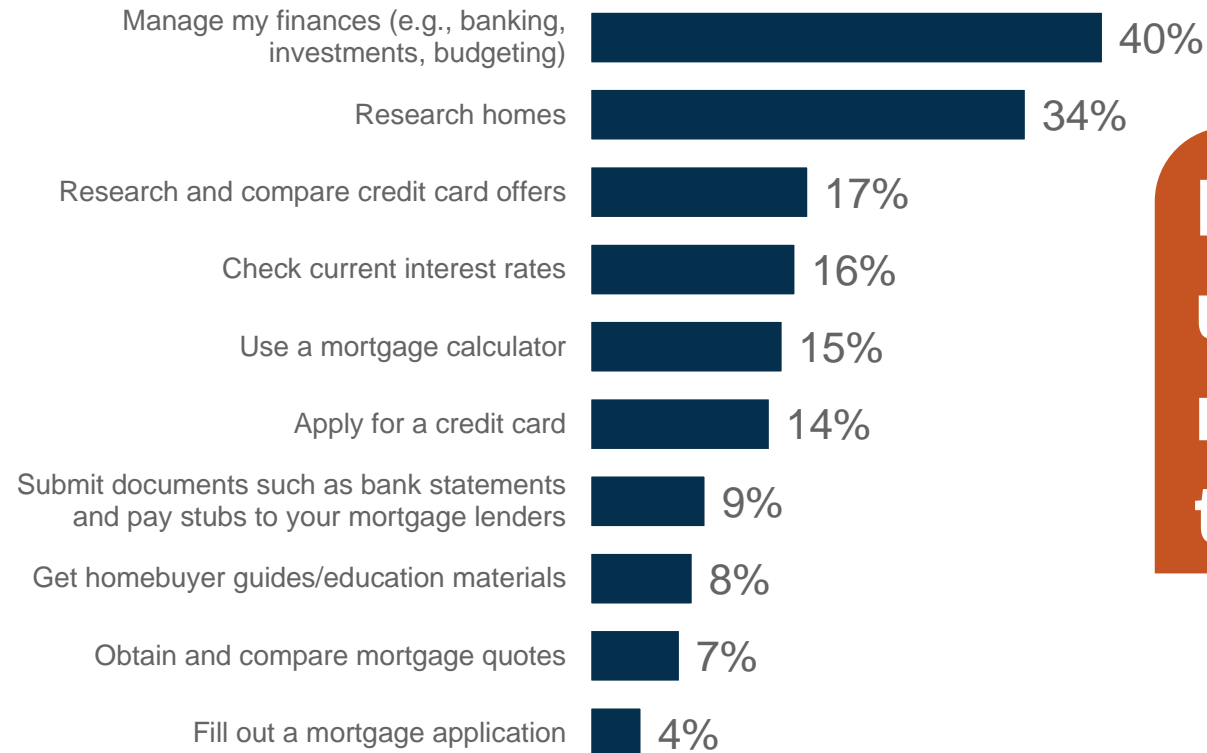

Mobile Technology

<u>Mobile Usage and Demand - Various Financial Services</u>	29
<u>Mobile Usage and Influence - Mortgage Information</u>	31

Americans Increasingly Turning to Mobile for Some Basic Financial Tasks

However, few are using mobile for mortgage-related tasks.

Base: Total respondents, N=3647

Q54. Have you done the following on a mobile device (such as a smartphone or tablet), done this some other way, or not done this? [% saying 'did this on mobile device']

Moderate Potential For Growth in the Use of Mobile for Mortgage Tasks

More want to submit documents to lenders via mobile, led by these cohorts:

- Age 35-49 (up 9 points)
- College graduates (up 9 points)
- Household Income \$100k+ (up 8 points)

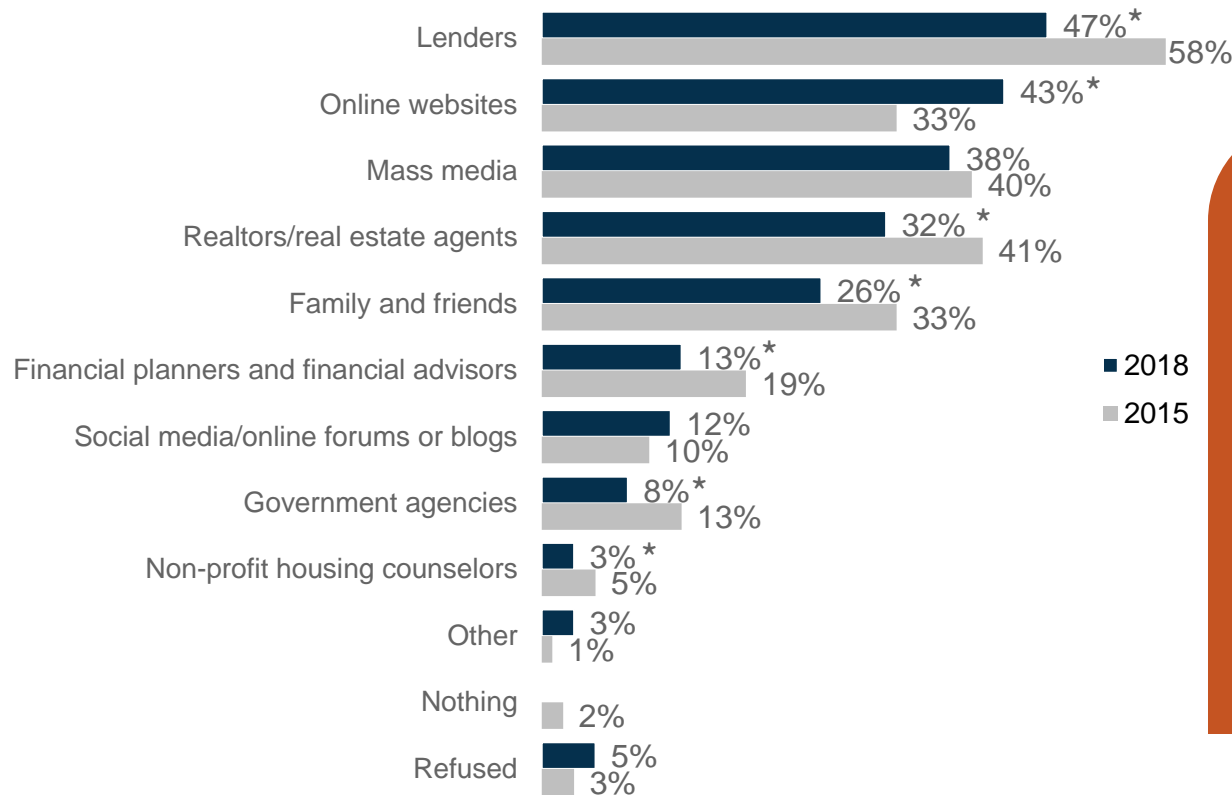

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018

Q55. Now, for the same list of tasks, please indicate whether you would like to do this on a mobile device in the future? [% saying 'yes']

Note: * = significant change

Use of Online Mortgage Information Grows as Other Sources Shrink

On the whole, there's been a significant increase in the use of online resources. However, these cohorts seeking mortgage information experienced a decrease:

- Lenders
- Realtors
- Family and friends
- Financial planners
- Government agencies

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018

Note: * = significant change

Q40. From which three of the following information sources do you read, see, or hear the most often about getting mortgages for home purchase or refinance? [selected up to three responses]

Most Influential Information Sources Remain Lenders and Family and Friends

Despite an increase in most influential ratings, online resources were still deemed only one-third as influential as lenders.

Base: Total respondents, N=3,483 in 2015, N=3,647 in 2018

Q41_1st. Generally speaking, which of the following is the most influential to you personally when it comes to getting advice about getting a mortgage for home purchase or refinance? [selected one response]

Notes: * = significant change; sources below 5% in 2018 or 2015 are not shown.

Methodology

Research Methodology

- An online survey of a total of 3,647 American adults, age 18+, nationwide, using Ipsos Public Affairs' KnowledgePanel® who are either the sole financial decision-maker or who share in the financial decision-making in their household (henceforth referred to as consumers).
- Of the total sample of 3,647 consumers, 3,026 interviews were among the general population of consumers screened to be either sole or joint financial decision-makers. In addition, oversamples of African-Americans, Hispanics, and Asian-Americans were added to ensure robust sample sizes for analysis of these subgroups.
- The size of these oversampled subgroups when combined with their natural fallout from the general population sample total:
 - 509 African-Americans
 - 514 Hispanics
 - 261 Asian-Americans
- The survey was made available in both English and Spanish. The survey was conducted July 30, 2018 – August 13, 2018.
- These data were weighted to reflect Current Population Survey benchmarks.
- The margin of error for the total sample is +/-1.7 percentage points, and is larger for subgroups.
- The response rate for this survey is 52 percent.

Research Methodology: 2018 vs. 2015

To allow for comparisons over time, the methodology for the 2018 Mortgage Qualification Research is largely similar to the 2015 Mortgage Qualification Research.

	2018	2015
Methodology	Online	Online
Sample Source	KnowledgePanel	KnowledgePanel
Survey Language	English & Spanish	English & Spanish
Oversamples	African-Americans, Asian-American, Hispanics	African-Americans, Asian-American, Hispanics, Self-reported good credit
Screening	Sole or joint financial decision-makers	Sole or joint financial decision-makers
Fieldwork Dates	July 30 – August 13, 2018	June 29 – July 15, 2015
Total completed interviews	3,647 (3,026 general public)	3,868 (3,030 general public)
Response rate	52%	54%
Weighting	To CPS benchmarks	To CPS benchmarks
Margin of error for total sample	+/- 1.7 percentage points	+/- 1.6 percentage points

Ipsos KnowledgePanel®

Ipsos describes its panel methodology, sampling, and services as follows:

- *Ipsos' KnowledgePanel® is the largest national probability-based panel that provides the highest level of accuracy and sample representativeness available in online research for measurement of public opinion, attitudes, and behaviors. The panel was first developed in 1999 by Knowledge Networks, now part of Ipsos, with panel members who are randomly selected, enabling results from the panel to statistically represent the U.S. population with a consistently higher degree of accuracy than results obtainable from volunteer opt-in panels (for comparisons of results from probability versus non-probability methods, see Yeager et al., 2011).*
- *Because every sample unit has a known selection probability, KnowledgePanel® is not susceptible to the “professional respondent” problem and other hazards of “opt-in” online panels based on convenience sampling. Unlike opt-in panels, individuals can become panelists only after being randomly selected; no one can just volunteer to be a member. Originally, panelists were selected using random-digit dialing (RDD) but address-based sampling (ABS) has been employed since 2009. ABS provides a statistically-valid sampling method with a published sample frame of residential addresses that covers approximately 97 percent of U.S. households, including households that:*
 - *Have unlisted telephone numbers,*
 - *Do not have landline telephones,*
 - *Are cell phone only,*
 - *Do not have current Internet access, and*
 - *Do not have devices to access the Internet.*

Ipsos KnowledgePanel®

Ipsos' KnowledgePanel® remains the only large-scale online panel based on a representative random sample of the U.S. population. Because of this, KnowledgePanel® has set the standard of accuracy in online surveys for researchers and meets the highest statistical standards for federal research and peer review.

Feature	Opt-in Panel	KnowledgePanel®
Coverage %	76% of U.S. households	97% of U.S. households
Sampling	Self-selected/convenience	Probability-based random
Non-internet Population	Excluded	Included
Latino Households	May/may not be included	Included without internet access
Sample Representativeness	Over-represents hyper internet users	Comparable to high-quality RDD with cell phone sample supplementation
Survey Frequency	Up to 20 or more per month	2 to 4 per month

Probability-selected internet panel that is statistically valid and projectable (due to Ipsos' address-based sampling recruitment methodology) and truly representative of U.S. population, which means a margin of error can be attached to the data.

Covers 97 percent of U.S. population and 93 percent of U.S. Hispanic/Latino households, including Spanish-dominant, English-dominant, and bilingual households alike.

Captures the ~10-12% percent of the U.S. without Internet access as well as the roughly 12 percent of U.S. Latinos who do not have access to the Internet at least occasionally by providing those panelists with a laptop and ISP.

Ipsos KnowledgePanel®

Ipsos' KnowledgePanel® respondent incentives include two types: survey specific and non-survey specific. Non-survey incentives are used to maintain a high degree of panel loyalty and to mitigate attrition from the panel.

For households provided laptops and internet connections, their “panel loyalty” incentive is the hardware and internet service that Ipsos provides for free. For households with their own computers and internet connections, there is a minimal award, in the form of points, given for each 15-minute survey session.

The survey specific incentives are provided to respondents as a result of one of two conditions:

1. The survey is expected to require more than 15 minutes of time to complete, at which time either a sweepstake entry or bonus points will be awarded;
2. There is an unusual request being made of the respondent, such as specimen collection, the viewing of a specific television program, or completion of a daily diary.

Most incentives are in the form of points although, from time to time, other types of award such as cash and sweepstake entries can be offered. Members can redeem their points for cash, merchandise, gift cards, or entries into games to win prizes.

Weighting

Weighting Design

Ipsos weighted the starting, total screened sample of the general population to benchmarks secured from the Current Population Survey for the 18+ population.

1. These weighting benchmarks were created while controlling demographics within Caucasians/Hispanics/African-Americans/Asian-Americans/Others on age, gender, education, income, region, metropolitan status and internet access.
 - Within Hispanics, Ipsos also weighted the data on primary language and origin.
 - Subsequently, Ipsos created a weighted benchmark for qualified respondents—financial primary decision-makers—from the weights that were computed for the starting main sample.
2. Next, Ipsos weighted all qualified respondents (N=3,647) back to the resulting benchmarks from Step 1 described above by controlling demographics within Caucasians/Hispanics/African-Americans/Asian-Americans/Others on age, gender, education, income, region, metropolitan status and internet access.
3. Finally, Ipsos trimmed and scaled the weights to the total qualified respondents (N=3,647).

Current Population Survey – Used For Weighting Benchmarks

The Current Population Survey (CPS), sponsored jointly by the U.S. Census Bureau and the U.S. Bureau of Labor Statistics (BLS), is the primary source of labor force statistics for the population of the United States. The full technical report can be found at: <https://www.census.gov/programs-surveys/cps/technical-documentation.html>.

Because of its long history and the quality of its data, the CPS has been a model for other household surveys, both in the United States and in other countries. The CPS is a source of information not only for economic and social science research, but also for the study of survey methodology.

The CPS is administered by the Census Bureau using a probability selected sample of about 60,000 occupied households. Fieldwork is conducted monthly during the calendar week that includes the 19th of the month, except for December when the survey is often conducted one week earlier to avoid conflicting with the holiday season.

Households from all 50 states and the District of Columbia are in the survey for 4 consecutive months, out for 8, and then return for another 4 months before leaving the sample permanently. This design ensures a high degree of continuity from one month to the next (as well as over the year). The 4-8-4 sampling scheme has the added benefit of allowing the constant replenishment of the sample without excessive burden to respondents.

The CPS questionnaire is a completely computerized document that is administered by Census Bureau field representatives across the country through both personal and telephone interviews. Additional telephone interviewing is conducted from the Census Bureau's two centralized collection facilities in Jeffersonville, Indiana; and Tucson, Arizona.

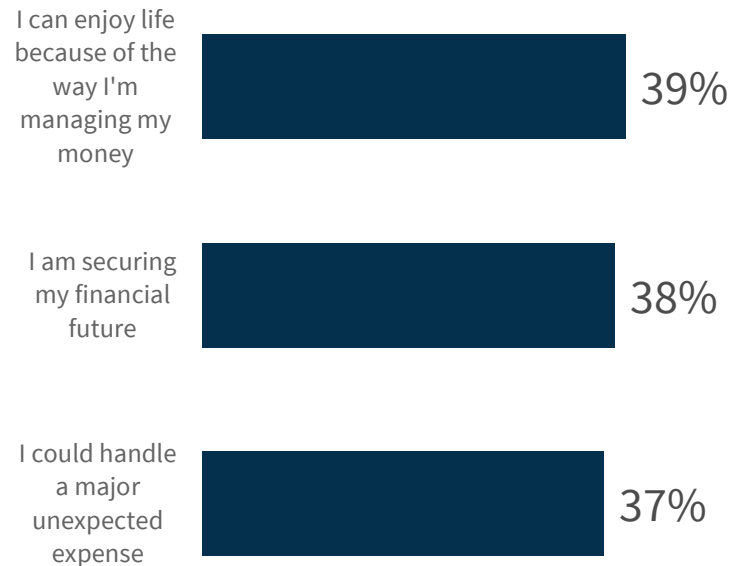

The methodology used, frequency with which the survey is conducted, sample size interviewed, and transparency and availability of core demographic data is, in part, why Ipsos utilizes CPS to inform its weighting benchmarks.

- Lower among African Americans

Buying a single company's stock provides a safer return

Base: Total respondents, N=3647

QT. Suppose you had \$100 in a savings account and the interest rate was 2% per year. After 5 years, how much do you think you would have in the account if you left the money to grow?

QU. Imagine that the interest rate on your savings account was 1% per year and inflation was 2% per year. After 1 year, how much would you be able to buy with the money in this account?

QV. Do you believe this to be true or false. 'Buying a single company's stock usually provides a safer return than a stock mutual fund.'

Focus: Two Groups of Non-Owners

1. Non-owners of homes who plan to buy on their next move but report getting a mortgage would be difficult

- Awareness
 - 57% familiar with term FICO® Score (vs 69% overall)
 - 50% don't know minimum % lenders require for down payment (vs 40% overall)
 - 18% familiar with programs to reduce % for down payment (vs 23% overall)
- Knowledge
 - 76% have seen their credit score (vs 87% overall)
 - 54% don't know own FICO® Score (vs 43% overall)
- Confidence
 - 73% could improve their credit score (vs 83% overall)
 - 6% confident of going through mortgage process today (vs 47% overall)

2. Non-owners of homes who plan to buy on their next move and are actively looking for a home

- Awareness
 - 74% familiar with term FICO® Score (vs 69% overall)
 - 39% don't know minimum % lenders require for down payment (vs 40% overall)
 - 34% familiar with programs to reduce % for down payment (vs 23% overall)
- Knowledge
 - 86% have seen their credit score (vs 87% overall)
 - 44% don't know own FICO® Score (vs 43% overall)
- Confidence
 - 88% could improve their credit score (vs 83% overall)
 - 27% confident of going through mortgage process today (vs 47% overall)

Disclaimer

Opinions, analyses, estimates, forecasts, and other views of Fannie Mae's Economic & Strategic Research (ESR) group or survey respondents included in these materials should not be construed as indicating Fannie Mae's business prospects or expected results, are based on a number of assumptions, and are subject to change without notice. How this information affects Fannie Mae will depend on many factors. Although the ESR group bases its opinions, analyses, estimates, forecasts, and other views on information it considers reliable, it does not guarantee that the information provided in these materials is accurate, current, or suitable for any particular purpose. Changes in the assumptions or the information underlying these views could produce materially different results. The analyses, opinions, estimates, forecasts, and other views published by the ESR group represent the views of that group or survey respondents as of the date indicated and do not necessarily represent the views of Fannie Mae or its management.
